

We provide our patients with the best possible standard of care.

**Retinal images are an essential part of your annual comprehensive eye exam.  
Because of this, we perform optomap<sup>®</sup> retinal imaging on all our patients:**

**optomap<sup>®</sup>:** When reviewed, the scan becomes a permanent part of your medical record, enabling the doctor to make an important comparison should potential vision threatening conditions show themselves at a future examination. Retinal problems such as **macular degeneration, glaucoma, retinal holes, retinal detachments, diabetic retinopathy and many systemic diseases** can now be seen without dilation\* for most patients. **The doctors at Superior Vision prescribe optomap<sup>®</sup> retinal imaging for all their patients once per year.**

**\*If an optomap<sup>®</sup> is performed, the doctor may not need to dilate your eyes.** Dilation is required if an optomap is not performed.

As part of your pre-test work up, we will capture optomap<sup>®</sup> images for review with the doctor during your examination today. There is a \$35.00 co-pay for this procedure. The service may be covered by your insurance\* if being used to actively follow disease.

***Please check one of the following:***

\_\_\_\_\_ I understand and accept the Optomap retinal exam.

\_\_\_\_\_ I prefer Dilation today.
